3 Complete stage and variable profiles

Identifiers receive cardinality and linkage summaries. Date values are protected. Continuous variables receive exact type-7 quantiles, missingness, full-range distributions and ECDFs. Selected Gaussian KDEs share the source-variable bandwidth and scale by observed population mass. Constant/sparse variables are displayed without a fabricated KDE. Category percentages identify all-patient and non-missing denominators; named unknown categories retain their approved meaning.

3.1 variable summary

3.2 patient id
