2.23 prior run reconciliation

Table 39: prior_run_reconciliation

requirement	status	note	n
keys	passed	Exact original-key/input field comparison; prior bundle 4a12a50220eb2a13efd9 58cba4784e8e9997b17f add15d580d0886ad6be9 5df1; metadata additions only	unavailable
indexes	passed	Exact original-key/input field comparison; prior bundle 4a12a50220eb2a13efd9 58cba4784e8e9997b17f add15d580d0886ad6be9 5df1; metadata additions only	unavailable
BMI	passed	Exact original-key/input field comparison; prior bundle 4a12a50220eb2a13efd9 58cba4784e8e9997b17f add15d580d0886ad6be9 5df1; metadata additions only	unavailable

requirement	status	note	n
adjustment	passed	Exact original-key/input field comparison; prior bundle 4a12a50220eb2a13efd9 58cba4784e8e9997b17f add15d580d0886ad6be9 5df1; metadata additions only	unavailable
outcomes	passed	Exact original-key/input field comparison; prior bundle 4a12a50220eb2a13efd9 58cba4784e8e9997b17f add15d580d0886ad6be9 5df1; metadata additions only	unavailable
source partition	passed	Exact original-key/input field comparison; prior bundle 4a12a50220eb2a13efd9 58cba4784e8e9997b17f add15d580d0886ad6be9 5df1; metadata additions only	unavailable
alternative index same	assessed; count only, no alternative model	Original indexed patients; alternate first eligible non-OBESITY-supported candidate. Earlier RFS uncertainty not converted to absence.	176922
alternative index changed	assessed; count only, no alternative model	Original indexed patients; alternate first eligible non-OBESITY-supported candidate. Earlier RFS uncertainty not converted to absence.	3402
alternative index unavailable	assessed; count only, no alternative model	Original indexed patients; alternate first eligible non-OBESITY-supported candidate. Earlier RFS uncertainty not converted to absence.	43190
alternative index membership unresolved	assessed; count only, no alternative model	Original indexed patients; alternate first eligible non-OBESITY-supported candidate. Earlier RFS uncertainty not converted to absence.	0
alternative index after pathway removal	not assessed	Requires private authent icated candidate/input comparisons; no equality inferred from totals	unavailable
cross project decomposition	not assessed	Requires private authent icated candidate/input comparisons; no equality inferred from totals	unavailable

2.24 rfs semantics

Table 40: rfs_semantics

requirement	status	note
OBESITY rfs	authenticated historical source membership	accepted compatibility FULL DATA encounter product; 252d4ae2f380a98d720b8ab7a84880db5b8b6357; original patient-encounter key; historical family/setting source-file representation; 0,1; metadata missing retained unknown; nonmembership after family merge; not clinical absence; Historical source extraction may retain earliest qualifying family/setting event; accepted flags authenticate membership, not exhaustive criterion ascertainment. Exact historical query parameters remain unavailable.; Source family includes BMI and diagnoses in producer catalog; actual historical trigger unresolved; do not infer from analysis BMI.
ABG rfs	authenticated historical source membership	accepted compatibility FULL DATA encounter product; 252d4ae2f380a98d720b8ab7a84880db5b8b6357; original patient-encounter key; historical family/setting source-file representation; 0,1; metadata missing retained unknown; nonmembership after family merge; not clinical absence; Historical source extraction may retain earliest qualifying family/setting event; accepted flags authenticate membership, not exhaustive criterion ascertainment. Exact historical query parameters remain unavailable.; Family implies a historical arterial selection criterion; may incorporate elevated gas. Producer catalog default lower bound 45; exact historical source query threshold/window not authenticated from flag alone.
VBG rfs	authenticated historical source membership	accepted compatibility FULL DATA encounter product; 252d4ae2f380a98d720b8ab7a84880db5b8b6357; original patient-encounter key; historical family/setting source-file representation; 0,1; metadata missing retained unknown; nonmembership after family merge; not clinical absence; Historical source extraction may retain earliest qualifying family/setting event; accepted flags authenticate membership, not exhaustive criterion ascertainment. Exact historical query parameters remain unavailable.; Family may incorporate elevated venous gas; producer catalog default lower bound 45 differs from current >=50. Actual historical query/window not inferred from default.

requirement	status	note
RESPFAIL rfs	authenticated historical source membership	accepted compatibility FULL DATA encounter product; 252d4ae2f380a98d720b8ab7a84880db5b8b6357; original patient-encounter key; historical family/setting source-file representation; 0,1; metadata missing retained unknown; nonmembership after family merge; not clinical absence; Historical source extraction may retain earliest qualifying family/setting event; accepted flags authenticate membership, not exhaustive criterion ascertainment. Exact historical query parameters remain unavailable.; Diagnosis family; producer catalog includes J96 prefix and E66.2, overlapping but broader than current five-code ICD outcome.
VENTSUPPORT rfs	authenticated historical source membership	accepted compatibility FULL DATA encounter product; 252d4ae2f380a98d720b8ab7a84880db5b8b6357; original patient-encounter key; historical family/setting source-file representation; 0,1; metadata missing retained unknown; nonmembership after family merge; not clinical absence; Historical source extraction may retain earliest qualifying family/setting event; accepted flags authenticate membership, not exhaustive criterion ascertainment. Exact historical query parameters remain unavailable.; Procedure-based family; may select severe respiratory illness, does not by itself define current gas outcome.
PREDISPOSITION rfs	authenticated historical source membership	accepted compatibility FULL DATA encounter product; 252d4ae2f380a98d720b8ab7a84880db5b8b6357; original patient-encounter key; historical family/setting source-file representation; 0,1; metadata missing retained unknown; nonmembership after family merge; not clinical absence; Historical source extraction may retain earliest qualifying family/setting event; accepted flags authenticate membership, not exhaustive criterion ascertainment. Exact historical query parameters remain unavailable.; Diagnosis-based family; not itself a complete current gas/ICD ascertainment.

3 Complete stage and variable profiles

Identifiers receive cardinality and linkage summaries. Date values are protected. Continuous variables receive exact type-7 quantiles, missingness, full-range distributions and ECDFs. Selected Gaussian KDEs share the source-variable bandwidth and scale by observed population mass. Constant/sparse variables are displayed without a fabricated KDE. Category percentages identify all-patient and non-missing denominators; named unknown categories retain their approved meaning.

3.1 variable summary

3.2 patient id
