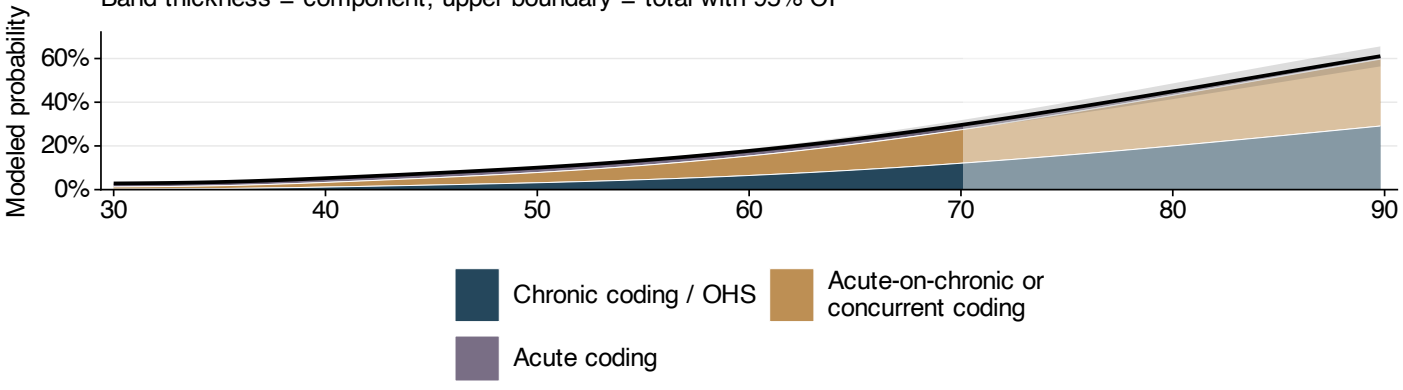
Sensitivity: exclude unspecified-only diagnosis category

BMI ≥30: secondary | Encounter-wide; model/reference N = 175,147 | Maximum likelihood
Events: chronic/OHS 1,752; acute/chronic 3,361; acute 3,201; excluded 124

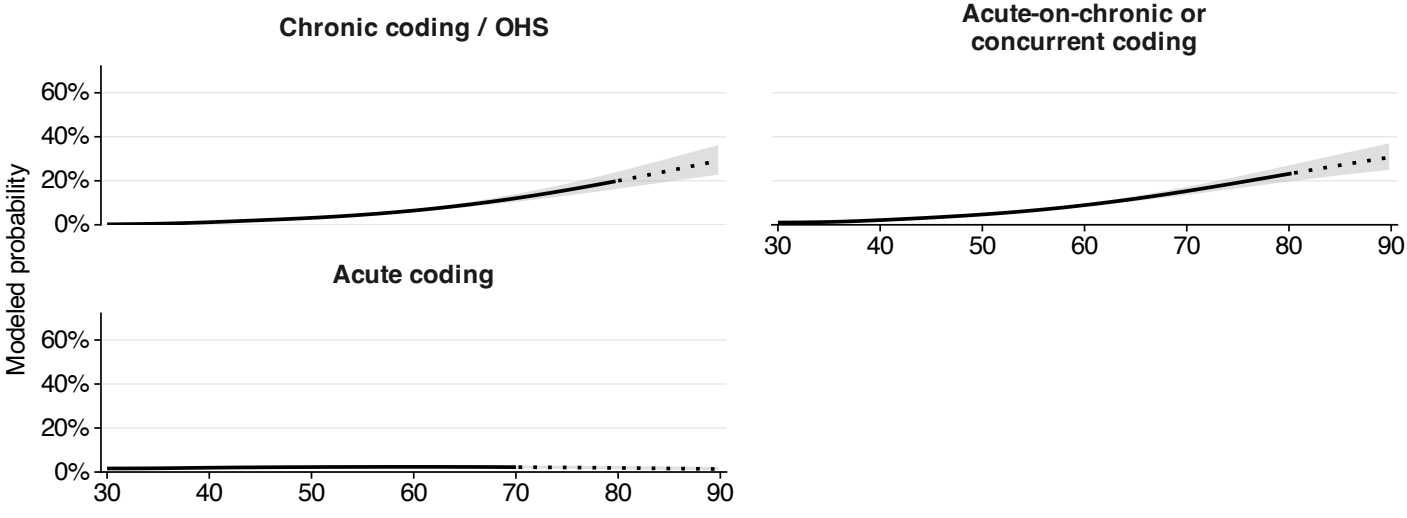
A Documented diagnoses divided by acuity coding

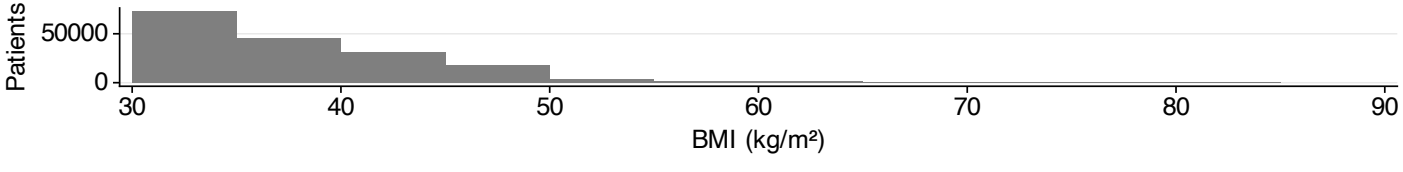
Band thickness = component; upper boundary = total with 95% CI



B Component magnitudes on common axes

Pointwise 95% intervals; dotted segments indicate local sparsity





C Patients in the shared diagnosis-capture population
